Beck Anxiety Inventory (BAI) | PY 099
(2 copies)
This test measures the severity of anxiety in adults and adolescents. Self-administered, 5-10 minutes to complete. Contents: Manual.
Check Availability
Beck Depression Inventory II (BDI-II) | PY 063
Check Availability

Beck Hopelessness Scale | PY 068
Check Availability

Beery VMI, 6th Edition (Beery-Buktenica Developmental Test of Visual-Motor Integration) | PY 009
Designed to assess the extent to which individuals can integrate their visual and motor abilities (hand-eye coordination). The purposes of the Beery VMI are to help identify, through early screening, children who may need special assistance, to obtain needed services for them, to test the effectiveness of educational and other interventions, and to advance research. Contents: Manual and Picture Card.
Check Availability

Behavior Assessment System for Children, 2nd Edition (BASC-2) | PY 052
Check Availability

Bender Visual Motor Gestalt Test II, 2nd Edition | PY 002
This test consists of sixteen stimulus cards with geometric designs. The test measures visual-motor integration skills in children and adults from 4 to 85+ years of age. It is individually administered. Two supplementary tests were added to the second edition (the Motor Test and
the Perception Test). Contents: Manual, 16 Stimulus Cards, Perception Test Form, Motor Test Form, Observation Form.

Check Availability

**Brief Symptom Inventory (BSI) | PY 029**

Derogatis, L. R., Ph.D. (1993). NCS.

Check Availability

**Brown Attention-Deficit Disorder Scales | PY 025**

"Measures symptoms of Attention-Deficit Disorders (ADD) in adolescents (12–18) and adults. The 40 self-report items are grouped into 5 clusters of conceptually related systems of ADDs." Contents: Diagnostic Form, and Ready Score Answer Document (Adolescent).

Check Availability

**California Psychological Inventory (CPI) | PY 003**

(6 copies)

A 462-item, self-report personality inventory designed to measure normal personality characteristics. Ages 13–70. When self-administered, it takes 45–60 minutes to complete. Contents: Manual, CPI form # 434, Booklets, Bubble Sheets, Profile Sheets, and Folk Concept Scales.

Check Availability

**Campbell Interest and Skill Survey (CISS) | PY 080**

The Campbell Interest and Skill Survey (CISS) is a survey of self-reported interests and skills. Its major purpose is to help individuals understand how their interests and skills map into the occupational world, thereby helping them make better career choices. The CISS contains 200 interest items and 120 skill items. Contents: Manual.

Check Availability
Career Beliefs Inventory | PY 072
“The inventory consists of 96 items answered on a five-point rating scale from ‘strongly agree’ to ‘strongly disagree’.” Contents: Manual, Applications and Technical Guide and Hand Scoring Key, #1–12.
Check Availability

Childhood Autism Rating Scale (CARS) | PY 053
Schopler, E., Ph.D., Reichler, R. J., M.D., & Renner, Barbara Rochen, Ph.D. (1988). WPS.
"The Childhood Autism Rating Scale is a 15-item behavioral rating scale developed to identify children with autism, and to distinguish them from developmentally handicapped children without the autism syndrome." Contents: Manual and Rating Sheet.
Check Availability

Children's Apperception Test—Animal Figures (C.A.T.) | PY 084
Projective technique consisting of 10 cards depicting drawings of animals in human-like situations. Can be used to describe personality or aspects of emotional disturbance. Most useful for ages 4–6. 20–45 minutes to administer. Contents: Booklet Manual (Animal), Cards #1–10.
Check Availability

Children's Apperception Test—Human (C.A.T.-H) | PY 085
Projective technique consisting of 10 cards depicting drawings of humans. Can be used to describe personality or aspects of emotional disturbance. Most useful for ages 4–6. 20–45 minutes to administer. Contents: Booklet Manual (Human), Cards #1–10.
Check Availability

Children’s Depression Inventory (CDI) | PY 073
(5 copies total, 1 copy restricted to MFT students)
Check Availability
**Children's Personality Questionnaire (CPQ) | PY 006**

Children's version of Sixteen Personality Factor Questionnaire (#28) for adults. Self-report personality inventory measuring 16 traits such as warmth, sensitivity, etc. Ages 8–12. Self-administered, 45–60 minutes to complete. Contents: Form A (1975 edition R), Scoring Key for Answer Sheet (Form A or Form C, Key #1–2), and Test Profile/Answer Sheet.

[Check Availability](#)

**Children's Version/Family Environment Scale | PY 007**

[Check Availability](#)

**Clinician-Administered PTSD Scale (CAPS) | PY 086**

The CAPS Interview Booklet consists of 30 interview items. Seventeen of the items assess core PTSD symptoms (grouped into the symptom clusters of Reexperiencing, Avoidance and Numbing, and Hyperarousal). Contents: Technical manual and Interviewer’s Guide.

[Check Availability](#)

**Cognitive Distortion Scales (CDS) | PY 074**

The CDS is a brief, 40-item test of dysfunctional cognitions. The scales assess self-criticism, helplessness, hopelessness, self-blame, and preoccupation with danger. Contents: Manual, Test Booklet, Profile Form: Male, and Profile Form: Female.

[Check Availability](#)

**Color Trails Test | PY 066**

A measure of an individual’s ability to maintain sustained visual attention, visual scanning, and graph motor skills to assist in assessing presence and extent of brain injury. Ages 18 and up. Individually administered. 10 minutes to complete. Contents: Record Form Packet, and Color Trails #1–2 Form A Packets.

[Check Availability](#)
Comprehensive Test of Nonverbal Intelligence (CTONI) | PY 027

The CTONI is a battery of six subtests that measure different but interrelated nonverbal intellectual abilities. The battery is designed for use with persons ages 6 years through 89 years, 11 months, and has empirically determined reliability and validity. Contents: Examiner’s Manual, Picture Book for Categories, and Picture Book for Sequences.

Check Availability

Conners 3 | PY 087

Conners 3 assesses Attention-Deficit/Hyperactivity Disorder (ADHD) and its most common comorbid problems and disorders in children and adolescents. The Conners 3 is a multi-informant (parent, teacher, and self-report) assessment of children and adolescents between 6 and 18 years of age. Contents: Manual.

Check Availability

Conners’ Rating Scales—Revised (CRS-R) | PY 008

Behavior checklist completed by parent and/or teacher that have 5–7 factors useful for screening for behavior problems. This checklist is best known for its ability to identify children with Attention Deficit Disorder. Ages 3–17. 15–20 minutes to complete. Contents: Technical Manual, Parent Rating Scale – Revised (S), and Teacher Rating Scale – Revised (S).

Millon Adolescent Clinical Inventory (MACI) | PY 057
Millon, T., Ph.D. (1993). NCS.
[Check Availability]

Millon Behavioral Medicine Diagnostic (MBMD), 2nd Edition | PY 095
“The MBMD inventory represents a substantial upgrading of the MBHI inventory (Million Behavioral Health Inventory; Million, Green, & Meagher, 1979, 1982). It is a 165-item, self-report inventory with 29 clinical scales, three Response Patterns scales, one Validity indicator, and six Negative Health Habits indicators. It is designed to assess psychological factors that can influence the course of treatment of medically ill patients.” Contents: Manual, Test Booklets.
[Check Availability]

Millon Clinical Multiaxial Inventory III (MCMI-III) | PY 013
[Check Availability]

Mini-Mental State Examination (MMSE) | PY 083
"The MMSE was developed as an aid to the clinical mental status examination that would allow clinicians to standardize and quantify the examination of the cognitive state." Contents: Clinical Guide, User’s Guide, and Pocket Norms Card.
[Check Availability]

Minnesota Importance Questionnaire | PY 064
Inventory to measure 20 psychological needs and 6 underlying values found to be relevant to work adjustment, specifically to satisfaction with work. Self-Report. Ages 15 and up. 20–35 minutes. Contents: Questionnaire. [Check Availability]
Minnesota Multiphasic Personality Inventory 2 (MMPI-2) | PY 014

Prepared by the MMPI Restandardization Committee appointed by the University of Minnesota Press (1989).

567-item, self-report personality inventory intended to measure psychopathology in adults. Scores now obtained on the original clinical and validity scales as well as the newly developed content scales. Replaces the MMPI. Ages 18 and up. Self-administered, takes 60–75 minutes to complete. Contents: Softcover Answer Sheet, Test Booklets, Profile for Supplementary Scales, Content Scales, Harris-Lingoes Subscales, Supplementary Scales, and Validity and Clinical Scales. Scales for scoring are available for use in the Twin Cities Library only.

Check Availability

Minnesota Multiphasic Personality Inventory 2 (MMPI-2) | PY 015

University of Minnesota (1989).

Audio version of the MMPI-2, which can be used to assist with diagnosis of mental disorders and selection of treatment methods. Contents: Two audio cassettes.

Check Availability

Minnesota Multiphasic Personality Inventory 2 Restructured Clinical Scales (MMPI-2-RC) | PY 097

University of Minnesota (2003).

This test monograph provides a detailed account of the development and validation of the MMPI-2 Restructured Clinical (RC) Scales. Contents: Two books in folder.

Check Availability

Minnesota Multiphasic Personality Inventory 2 Restructured Form (MMPI-2-RF) | PY 091

The MMPI-2 Restructured Form provides an exhaustive assessment of the clinically significant substances of the MMPI-2 item pool. The 338 question MMPI-2-RF consists of empirically validated scales that provide information on the individual test taker’s clinical symptoms, personality characteristics, behavioral tendencies, interpersonal functioning and interests. Contents: Administration Manual, Technical Manual.

Check Availability
Minnesota Multiphasic Personality Inventory 2 (MMPI-2) Structural Summary | PY 089

The MMPI-2 Structural Summary provides a system for collecting related information in new ways and facilitates comparisons of relationships between MMPI-2 scales to derive a more complete picture of the individual. The MMPI-2 Structural Summary helps to organize and order MMPI-2 observations within six major content categories, capturing themes across scales. It facilitates generation of interpretive hypotheses, and is particularly helpful for interpreting atypical profiles. The Structural Summary also provides an outline for the preparation of psychodiagnostic reports. Contents: Manual.

Assessment Tests

Assessment tests may be checked out only by students enrolled in specific courses. Students enrolled in PY621, PY631, PY632, PY633, or MFT650 may check out tests labeled PY and MFT. Students in the PSYD doctoral program may check out PY and MFT tests. Students in the EDD doctoral program may check out tests labeled EDD.

Assessment Test Database

PsycTESTS

PsycTESTS provides access to published and unpublished psychological tests, measures, scales, and surveys, as well as descriptive information about the resources including their development, reliability and validity, and administration.

Assessment Test Critiques

Mental Measurements Yearbook with Tests in Print

Mental Measurements Yearbook provides users with reviews on current assessment tests. This database is good for students who want to evaluate testing products for education, marriage and family therapy, and psychology. Tests in Print is an index to assessment tests that are currently in print. This index provides reviews and information about each test that will help users make educated decisions regarding test quality and validity.

Buros Institute of Mental Measurements Test Reviews Online

Buros Institute of Mental Measurements Test Reviews Online is a great source for finding citations for reviews of psychological tests. Buros contains information regarding 3,000 tests. Note: Buros does not contain the actual tests.
