

Full time CRNA position is available with McAllen Anesthesia Consultants, PA.

Staff CRNA. This OR is for people who really want to do anesthesia. 22000 cases / 12 staff members in main OR alone. No trauma, transplants or hearts. Two MDA's are in the main OR and they do their own cases. CRNA's are required to do their own cases. No one looks over your shoulder but if you need help you have it. The OR has 14 rooms, anesthesia personnel have complete control over scheduling of cases and nurses. We will teach lines and regional blocks as needed. I like having new grads and want them to get proficient with all the techniques they have learned. OB practice can be arranged.

It's a 1099 position unless the candidate is dying to be an employee. I can talk to a prospective candidate in detail if that's something he/she would like. Pay is \$1000.00 per day. There are no other benefits. Initially that may sound cold but it has evolved over time to the benefit of the CRNA and McAllen Anesthesia. Basically, the salary is \$5000.00 per week, Monday through Friday. The average work week is fairly constant at 45 hours/wk. Approximately 8-9 paid holidays per year.

Call pays extra if CRNA takes it. All call is from home. Weekends 24 hour shifts at \$1500.00/day. Weekday call pay is \$500.00/night; M-Th. from 2100 to 0700h plus an additional \$150.00 if you get called in. Fridays call pay is \$650.00/nt flat rate but same hours of coverage. Vacation time is unpaid. CRNA can take as much as he/she can afford as long as they realize although we pay like a locum we have too many cases for someone to be out several weeks at a time. Technically everyone has to be prepared to work call but for the last 4 years only 4-5 people are covering all the call.
